PDF Report Format

Child Behavioral Assessment and Management: Second Edition.

New edition of the popular book by Carey & McDevitt (2016) based on the concept that behavior in primary care should be viewed as a spectrum where normal conflicts shade into problems and then disordered behavior, rather than making categorical judgments about whether symptoms are severe enough to diagnose and treat as an abnormal condition.

Link: www.b-di.com/CBAM2.html

Updated CTS Questionnaire Design!

With attractive new colors and layout, the CTS questionnaires have their first update since 1995.

The five age groups and items remain the same but are easier to read and score using software.

Order with new scoring and profiles sheets for hand scoring or 'questionnaire only' sets for use with iReport Writer software on CD or online. No price increase!

**100% electronic 'cloud' based assessment.
Free registration to become an etesting.center professional**

EESTING.CENTER CAPABILITIES

Excellent for telehealth clients!

Steps for Use:

- 1) Send an email referral to the client. Etesting.center contains self-report, caregiver report and teacher report measures, including all temperament assessments, and others for behavior, depression, anxiety, ADHD, etc.;
- 2) Client accepts terms of use, completes the questionnaire online and submits it. Questionnaire is instantly scored and a report is created. Questionnaire results are placed in the professional's account;
- 3) Professional meets with the client to interpret the results. If appropriate, the report can be shared with the client;

The cost is determined by the professional: client pays by credit card, professional pays a discounted fee, or purchases uses at an even lower fee per use (as low as \$3. per use when purchased in bulk). Details are in the Users Guide sent with registration.

New User? Just use the Sign Up link to enter your Background data and submit it to the Admin. Once reviewed, the account will be activated and professional is informed within 24 hours. It is simple and free!

*Qualified status: Users with a professional degree, a license in a medical, educational or behavioral health area, or a student under supervision of a qualified professional are eligible.

Visit www.etesting.center Look for [Sign Up](#) at the top.

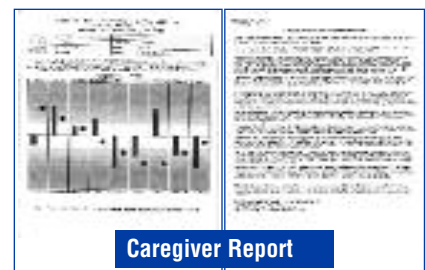

CTS Online Scoring System

All Information Now Secure in Professional's CTS 5 Account

The new CTS 5 iReport Writer 5 software scores completed paper questionnaires for any of the 5 Carey Temperament Scale age groups. The account format increases security and convenience at the same time! Designed to meet encryption standards consistent with HIPAA compliance, the new CTS iReport Writer 5 maintains all client data inside the user's online database account. Secure login protects client information within the professional's account. Reports can be archived within the database location when no longer needed. No personal data are sent in email notifications. The new account format puts all scored reports at the professional's fingertips, ready to print or download in pdf or just view online.

A Professional and a Caregiver report are both included with each iReport Writer scoring use. The reports include a temperament profile and individualized interpretations of status using a 5 level scale from high to low on each of the nine NYLS dimensions. Professional reports also include Validity Checks such as missing data, social desirability and discrepancy ratings as well as raw and zscore data for each category score and general impressions of temperament.

The Caregiver report can be provided to the questionnaire respondent at the discretion of the professional. It includes the Temperament Profile graph and category interpretations that are personalized for name, age and gender, with simplified explanations of temperament traits and simple tips for improving 'fit' with the youngster (see below).

Supports Edge, Firefox, Chrome or Safari browsers. Secure connection.

Report Writer 5 can be accessed from any internet connection, home, office, even when travelling. Online connections are secure, using the highest level of web encryption.

For current customers, previous CTS Scoring uses will be upgraded to Version 5 when 25 or more uses are added.

Link: www.b-di.com/ctsindex

Purchase of any CTS iReport Writer 5 product of 25 or more will upgrade all previous uses to Version 5.

The Carey Temperament Scales

Assess individuality in behavioral style from infancy to adolescence

Professional Practice Sets

Temperament questionnaires are excellent for use in the short-term treatment of behavioral issues or parenting problems. These tools are used by clinicians and early interventionists for parent training, education, and consultation in primary health care settings. The CTS instruments may be incorporated into the practices of professionals trained in several disciplines, including physicians, psychologists, social workers, counselors, therapists and others with advanced training who work with children in behavioral health, education and the healing arts.

With Hand Scoring (see pages 8 and 9 for scoring software)

Questionnaires below include scoring and profile sheets for hand scoring, which takes 10-15 minutes. Questionnaire item scores are transferred to the scoring sheet and category scores are plotted on the profile sheet. Sets include a Test Manual & User's Guide (revised 2007), and questionnaires. Purchasers may specify how many questionnaires of each age group are desired. If not specified, 5 of each or 20 of each will be supplied.

ITEM#	DESCRIPTION	QUESTIONNAIRES INCLUDED	COST
CTSP25	Professional Practice Set	25*	\$79.95
CTSP100	Professional Practice Set	100*	\$149.95

Professional Practice Set

BSQ Questionnaire with scoring and profile sheet

Refills With Scoring & Profile Sheets

Available for use in research or clinical practice, the five questionnaires in the series utilize between 75-100 descriptions of behavior to assess the nine NYLS temperament characteristics. These print questionnaires come with a scoring sheet and profile sheet for use in interpreting questionnaire results. Questionnaires take about 15 minutes to process and yield raw scores. (Test Manual and User Guide not included)

Questionnaires and age ranges are: EITQ 1-4 months, RITQ 4-11 months, TTS 12-36 months, BSQ 3-7 years, MCTQ 8-12 years. Purchasers may specify how many of each type is included in the total of 25 or 100 items. Using the order form or, on the web, the Select Quantities boxes, to indicate the numbers of each questionnaire desired. If not specified, 5 or each or 20 of each will be sent.

ITEM#	DESCRIPTION	QUESTIONNAIRES INCLUDED	COST
CTSRQ25	specify or 5 of each age	25*	\$59.95
CTSRQ100	specify or 20 from each age range	100*	\$139.95

You Won't Be Treated Like a College Sophomore!

...unless you are one!

The new online ATQ2 has been updated to incorporate age and gender norms for 16 different groups ranging from teens to 60+. So no matter your age or gender, your temperament profile will reflect your individual demographics and compare you to others like yourself. The new norms were established, based on over 6400 adults who completed the original ATQ. The process allows users to select the norms to be used for their temperament profile (e.g., college age males, females in their 40s, etc.) or to use the original, now called 'classic,' norms. Doing this adjusts the user's profile interpretations to an appropriate age and gender comparison group, resulting in

a more meaningful interpretation. In addition profile category descriptions have been extended from three to five levels for each of the nine scales, allowing for finer grained statements about temperament for each individual.

So whether you just want to discover your own temperament profile, or let your whole class learn about theirs, the ATQ2 is ready to go at link: www.b-di.com/atqweb.html

New Facebook Group: Child Practitioners Network

Join this online forum for professional discussion of the role of temperament in parenting infants, children and teens. Members may post questions, problems, techniques and methods for dealing with temperament in their practices. The forum is open to practitioners and researchers who envision applications of their findings, as well as professionals who deal with education, prevention and/or intervention in their professional practices.

The CPN Facebook page can be found [here](#):

Temperament Consortium

also
countries

The Temperament Consortium is a network of professionals interested in the study of individual differences in temperament. They engage in teaching, research, practice, and education of students and/or the public about the impact of temperament. Students working in the area are welcomed. Currently over 400 professionals from 26 comprise the TC group. Activities include the temperament listserv, membership directory and occasional temperament conference (**OTC**) meetings.

Adult Temperament Questionnaire 2: 2017 Edition

by Stella Chess MD & Alexander Thomas MD

2017 Update! New questionnaire design!

Determine temperament profile in parents or clients 13 or older, using the expanded ATQ2 norms. Areas where there are problems in 'fit' can be identified and addressed with ATQ2. Adult temperament characteristics can now be assessed more accurately with this 54 item self report questionnaire, which is easily administered and scored using the profile and scoring sheets included with the set, or with online scoring software (see page 5). The new version includes 6 experimental items designed to strengthen the psychometric properties and coverage of the original NYLS items. The process now allows users to select specific norms for their temperament profile (e.g., college age males, females in their 40s, etc.) or to use the original, 'classic,' norms. In addition profile category descriptions have been extended from three to five levels for each of the nine scales, allowing for finer grained statements about temperament for each individual.

ATQ Test Manual & User's Guide

ATQ Questionnaire with scoring and profile sheet

The ATQ2 has a new, easier-to-use scoring technique which reduces scoring time to about 5 minutes. Software includes administration of questionnaire items on a computer screen in about 10 minutes or scoring of the results of a paper questionnaire in 2-3 minutes.

New version available at the original ATQ2 pricing!

ATQ2 2017 Edition Online Scoring Software

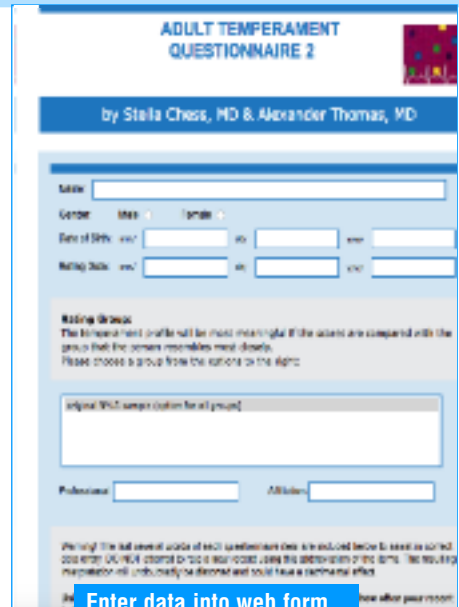

New ATQ iReport Writer 2017 Edition

The ATQ2 iReport Writer allows the professional to administer and score the ATQ2 questionnaire online. Questionnaire results can be input online by the professional or a clerical assistant and reports viewed instantly over the internet. Report copies can be obtained immediately by printing from the internet browser.

Each Professional Practice Set includes the ATQ Test Manual, User's Guide and questionnaires for use with adult clients. Requiring only an email account and internet access with a standard browser, the iReport Writer allows web-based scoring and interpretation of the ATQ with reports archived in an html format. An email with the report confirmation number is sent to the professional within seconds of completion! Individual user name and password are provided to log into a protected area containing the questionnaire input.

Results can also be saved in a text file on the user's computer following simple instructions provided. Copies of ATQ reports are also archived for one year in html format for documentation and viewing in a browser program. Reports can be retrieved at any time and pasted into a word processing text file for permanent documentation, editing or viewing in a browser window.

Supports Firefox, Chrome, IE and Safari browsers

The BASICS Behavioral Adjustment Scale

The BBAS is 48 item parent report questionnaire that determines behavioral adjustment in 4 to 14 year old children. Behavioral adjustment is defined by 5 areas of functioning:

- B**ehavior in social relationships (parents, sibs, teachers, etc);
- A**chievement (schoolwork, homework, chores, hobbies);
- S**elf-Relations (self-esteem, self-care, self-regulation);
- I**nternal State (contentment, anxiety, mood, thought processes);
- C**oping (identifying, solving, persisting, etc);
- S**ymptoms (eating, sleeping, elimination, etc).

The aspects of behavior assessed by the BBAS go beyond the child's normal temperament style to determine the level of behavioral adjustment, including symptoms and areas of difficulty in functioning in the youngster's home, school and community settings. While not diagnostic of emotional or behavioral disorders in DSM-IV, the BBAS identifies areas that need to be addressed to improve overall adjustment. Individual item scores can be used as markers for areas where further assessment and possible intervention are needed. Scale scores are compared with a large sample of normal children aged 4-14 to see where the child stands in comparison to peers at the same age level. Together these data can assist the clinician in setting up an overall plan to meet the child's needs. The new version allows for separate use of the Questionnaire and Information sheet. Professional users may use either or both, at the same or different times.

BBAS Professional Practice Sets with Profile Sheets

The Professional Practice Set includes the BBAS Test Manual and 25 or 100 questionnaires, with information and profile sheets for hand scoring.

BASICS iReport Writer Software

online scoring of behavioral adjustment

BBAS Online Scoring Report

The internet scoring version of BBAS (iBBAS) utilizes the web for scoring the questionnaire and generates a written report that displays the scores and organizes the results. Users need an internet connection and a valid email address to implement this option. Login information, including url, username and password, is provided with the software uses order. Online scoring is accomplished by logging in to an internet page and entering the BBAS ratings from the BBAS questionnaire. The scoring program generates a 3 page report which summarizes the caregiver's responses into a visually appealing and clinically useful document in html format. An email notifies the professional of the confirmation number of the report which can be accessed on the web for one year following the date of scoring. The report document can be printed in color or b/w, posted on the internet or emailed to the caregiver or another professional for easy viewing in a standard web browser. The html file can also be saved on the professional's own computer using the simple instructions provided.

iBBAS Professional Practice Sets

The iBBAS Professional Practice Sets includes the Test Manual and 25 or 100 questionnaires, in addition to 25 or 100 internet scoring uses.

Coping with Children's Temperament: A Guide for Professionals

Still available through digital reprint! In stock!

..."Carey and McDevitt have provided a most readable and useful account of how temperament differences among children matter with respect to their behavior and development.

Any professional who deals with children will find this practical, but scientifically informed account of temperament very helpful."

-Michael Rutter, MD, Institute of Psychiatry, London

Item # CCT

\$35.00

Understanding your child's temperament. SECOND EDITION!

by **William B. Carey, MD with Martha Jablow.**

Written for parents and professionals by one of the foremost experts in the field, this is a comprehensive guide for caregivers who are challenged by a temperamentally 'difficult' child. This book educates and informs the average reader about temperament and gives practical advice about how to

- 1) understand behavioral style in infants and children, and
- 2) address concerns about behavior. It also contains an informative list of resources for parents who need support and guidance.

"(Dr. Carey) explains what temperament is, why it is significant, and how it affects both children and parents. He shows parents how to recognize and handle a range of different--yet normal--temperament styles. Perhaps more important, he offers solid suggestions for working effectively and harmoniously with a child's inborn temperament."

-C. Everett Koop, MD
From the Foreword.

Child Behavioral Assessment and Management: Second Edition.

William B. Carey, MD & Sean C. McDevitt PhD, (2016)

This book is intended for professionals who work directly with children in a primary care setting. This includes not only nurses and primary care physicians but also teachers, daycare workers, school psychologists, social workers, various therapists and others. Written by two clinicians who have practiced for many years in primary care, this presentation rejects the notion that behavioral status should only be classified as normal or abnormal. Rather, it suggests that primary care professionals should view children's behavior on a spectrum where annoying normal variations may shade into problems and then to disordered behavior requiring specialized care. This perspective is preferable to the limited approach of simply making categorical judgments about whether the problems are severe enough to be diagnosed and treated, or that there is no real problem. By taking into account matters of aversive temperament and atypical behavioral adjustment as well as behavioral disorders, the entire range of behavioral concerns can be considered.

The second edition of CBAM offers new content, including discussion of areas of temperament beside the one the authors have found most useful and a more detailed review of the application of temperament counseling. A new chapter deals with the confusion of terminology that has crept into the behavioral health field in recent years.

Content of CBAM2 is freely distributed as a PDF file (see below)
